ALIGETI RAJESH

Hyderabad, Telangana
+91 8247025410 | aligetirajesh782@gmail.com | rajesh-aligeti-38a6a227b | github.com/Rajeshaligeti

Education

B V Raju Institute of Technology *Sep. 2023 - May 2027*
B.Tech CSE with specialization in Artificial Intelligence and Machine Learning CGPA: 8.14

Experience

- **Nirvaha** *May 2025 - Aug 2025*
Software Engineer Intern
  - Developed backend services for **Studlyf,** implementing core **APIs** and server-side logic for content aggregation.
  - Integrated Google, News, and YouTube APIs to fetch and serve real-time educational content.
- **DIIGOO** *Jun 2025 - Sep 2025*
AIML Intern
  - Trained and finetuned a **BERT**-based **NLP** model on a custom dataset, achieving 85% validation accuracy.
  - Enhanced the training pipeline, reducing training time by 20% and improving prediction consistency.
- **EY Global Delivery Services (GDS)** *Dec 2024 - Jan 2025*
Full Stack Intern (MERN)
  - Built a **full stack** web application with **RESTful APIs** and modular frontend components.
  - Improved application load time by 25% through backend query optimization and frontend code refactoring.
- **VaultofCodes** *Sep 2024 - Oct 2024*
Web Developer Intern
  - Built and deployed a functioning website for **Editkaro.in** using HTML, CSS, React, and JavaScript.
  - Implemented email automation using **Google Sheets API** and **Nodemailer**.
- **Edunet Foundation** *Jun 2024 - Jul 2024*
AI & Cloud Intern
  - Trained a **Logistic Regression** model on the **Framingham Heart Study** dataset.
  - Applied feature engineering to improve the ML pipeline, achieving 91.90% accuracy for clinical risk prediction.

Projects

- **InsightViz** | *Django, Pandas, Matplotlib* *Jan 2025*
  - Designed an interactive analytics platform enabling real-time exploration of user uploaded datasets
  - Implemented dynamic filtering, automated data preprocessing and visualization pipelines using Pandas and Matplotlib.
- **HOPE – AI Healthcare Platform** | *React, Node.js, Express, MongoDB, Gemini AI* *Oct 2025*
  - Built a full stack **MERN** healthcare platform with AI-powered symptom analysis, and personalized wellness tools.
  - Designed REST APIs and responsive **React** dashboards, integrating AI for real-time health insights and recommendations.
- **AI Sentiment Analyzer** | *Flask, Gemini AI, LangChain* *Feb 2026*
  - Built and deployed an **LLM-powered** sentiment analysis web application supporting real-time and batch text processing.
  - Integrated **Google Gemini AI** with **NLP pipelines** for sentiment analysis, word cloud generation, and AI insights.

Technical Skills

- **Languages:** Python, Java, C, JavaScript, SQL
- **Full-Stack Development:** React, Node.js, Django, Flask, Streamlit, HTML5, CSS3, MongoDB, REST APIs
- **Machine Learning & AI:** Scikit-Learn, TensorFlow, NumPy, Pandas, Matplotlib, LangChain, Ollama, LLMs
- **Tools & Cloud:** Git, GitHub, Postman, Selenium, Jupyter Notebook, Google Colab, VS Code

Certifications/Achievements

- Awarded **1st Place** in the **IT Domain** at **PALS Think2Impact Industry Problem Solving Workshop** as **Team VisionTech**.
- Advanced to **Semi-Finalist** stage at **NASA Space Apps Challenge 2025** for developing **VISHWA**, an AI assisted space exploration and astronomy web application.
- Represented **BVRIT** at **WADLA 4.0 Hackathon, Madhya Pradesh**, developed rapid AI driven prototypes under 24 hour competition.

Coding Profiles

HackerRank: aligetirajesh | **GeeksforGeeks**: aligetirajcn4 | **LeetCode**: Rajeshaligeti | **CodeChef**: aligetirajesh
